# 弧形阀系列
# Arc valve series

## HXF type

核心功能
可替代球阀
通道分别独立控制
柔性清理器经过阀门

Core functionality
Can replace ball valves
The channels are controlled independently
The flexible cleaner passes through the valve

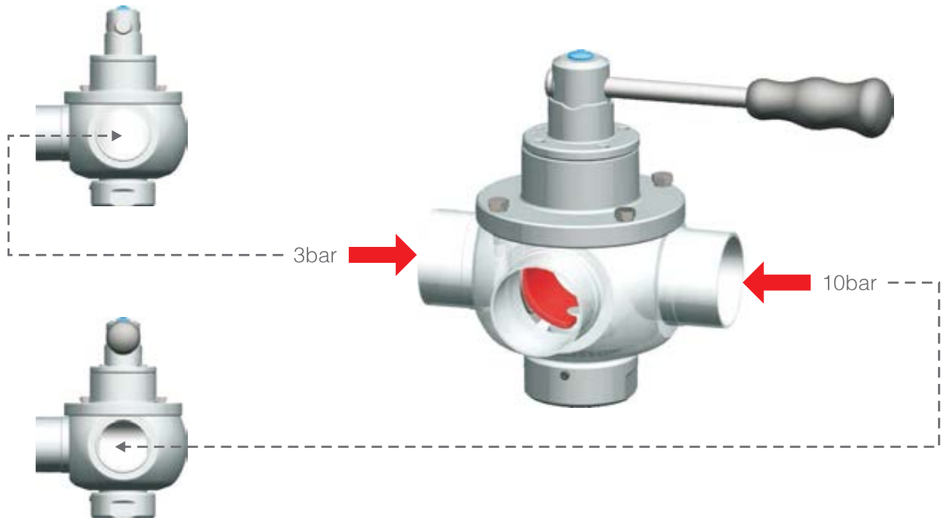

弧形阀是一款高洁净卫生设计的阀门，它可以使用在管路清理系统上也可以作为切断，换向或复杂工艺管路系统。

- ●规格：1"–4", DN25–DN100
- ●材质：SS304/316L
- ●温度：Max 140℃
- ●压力：外弧3bar/内弧10bar

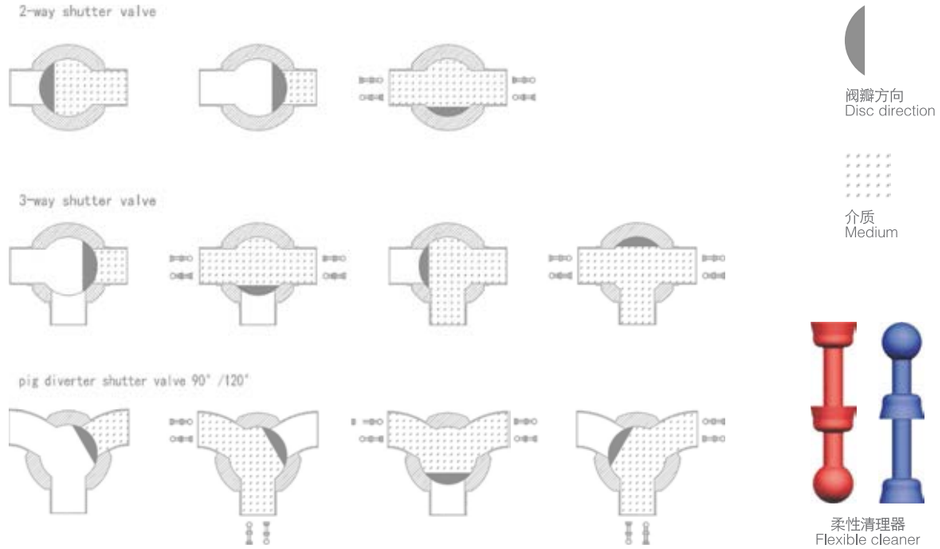

Arc valve is a kind of high cleanliness sanitary valve, it can be used in the pipeline cleaning system can also be cut off, reversing or complex process pipeline system.

- ●Specification: 1"–4",DN25–DN100
- ●Material: SS304/316L
- ●Temperature: Max 140℃
- ●Pressure: outer arc 3bar/ inner arc 10bar

## 优势 Advantage

全通径、无流阻、颗粒通过与通径相等、高粘度滞留在管道的物料借助管路柔性清理器对其回收，阀门通道独立分别关闭。

Full–diameter, no flow resistance, particles pass through the same diameter, high–viscosity trapped in the pipeline material with high viscosity independently closed the recovery valve channel with the help of a pipeline flexible cleaner.
